

Perimeter gap	Distance between door leaf and substrate = 15mm
Testing (Acoustic)	Acoustic performance compliant with BS EN 10140-2: 2010

Astragal Meeting Stile Seal | Technical Datasheet

Suitable for use on the meeting edges of double doorsets to ensure effective acoustic perimeter sealing. Finished in anodized silver aluminium.

Product Features

- Acoustic attenuation up to 34dB when used with a double doorset and additional Harmony perimeter seals.
- Suitable for left and right handed applications.

Application

Suitable for use in double doorsets which need to achieve acoustic attenuation.

Product Availability

- Product Code AMS2100.
- Length 2100mm.

Trimming - Cut Tolerances

The seal can be trimmed to suit the height of the door.

Compression Seal

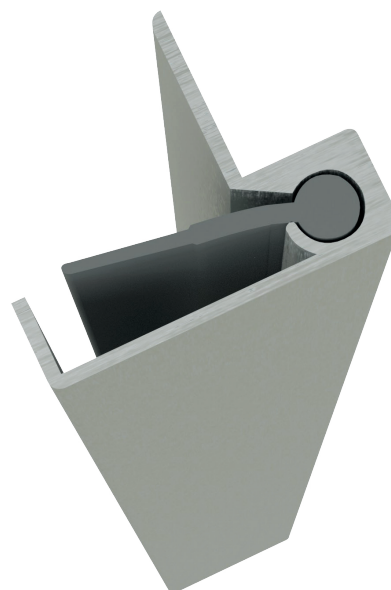

A grey thermoplastic seal with an integral fin.

Maintenance

Whilst no maintenance is required, we strongly recommend that the product is inspected regularly to check if the compression seal has been compromised.

Material safety datasheet

The product does not contain any hazardous components.

34dB
